PROFESSIONAL PROFILE

Cloud & Platform Engineer with 4 years of experience delivering robust infrastructure solutions for Tier-1 French enterprises (**Carrefour Group, Orange Group**). Expert in Infrastructure as Code (IaC), specializing in designing scalable, automated environments on Azure and GCP.

TECHNICAL EXPERTISE

Cloud & IaC: Azure (RBAC, Networking, Scaling), GCP, Terraform (Modular Architecture), Ansible
Orchestration & SRE: Dollar Universe (\$U), Workload Automation, Infrastructure Resilience, MCO
Systems & Scripting: Advanced Linux, Windows Server, Shell, Python (Automation), PowerShell
CI/CD & DevOps: GitLab CI, Jenkins, Docker, Kubernetes (GKE), HashiCorp Vault
Security & IAM: Identity Management (AD, Azure AD, Okta), SAML, OAuth2, OIDC
Observability: Google Cloud Operations, Prometheus/Grafana, Log Aggregation & Analysis

PROFESSIONAL EXPERIENCE

Devoteam (Client: Carrefour Group)

Sept. 2025 – Present

Cloud Platform & DevOps Engineer

- **Infrastructure Automation:** Leading the end-to-end provisioning of hybrid-cloud environments using **Terraform** and **Ansible** on **Azure** (Dev/UAT/Prod) and **GCP**.
- **Platform Engineering:** Designing enterprise-grade CI/CD pipelines **Jenkins/Gitlab ci** to streamline deployment workflows for global retail applications.
- **Workload Orchestration:** Architecting and maintaining **Dollar Universe** (\$U) scheduling ecosystems to ensure mission-critical batch integrity.
- **System Reliability:** Minimizing downtime by optimizing job dependencies and resource allocation; conducting root-cause analysis (RCA) to prevent recurring system failures.

Sofrecom (Client: Orange Group)

Jan. 2022 – Sept. 2025

Software & Cloud Engineer (Ops-Focused)

- **Cloud Architecture:** Managed **GCP** infrastructure (GKE, Cloud Run, GCS), implementing granular IAM security policies and advanced networking/firewall rules.
- **Modular IaC:** Developed reusable **Terraform** modules to standardize cloud deployments across multiple project teams.
- **Secrets Management:** Integrated HashiCorp Vault into deployment pipelines to centralize identity and sensitive data management.
- **Proactive Monitoring:** Built observability dashboards to track performance metrics, enabling pre-emptive scaling and capacity planning.
- **Backend Development:** Engineered **Python** services for high-volume data extraction and automated complex end-to-end business workflows.

Internships & Projects (Software Engineering)

2019 – 2021

Tech'Up Consulting, Iovision.io, Acteol

- **Enterprise Backend:** Developed Java/Spring Boot microservices for high-throughput insurance data processing.
- **Data Modeling:** Designed and optimized relational database schemas (PostgreSQL) and complex SQL queries for performance-intensive applications.

EDUCATION

ENIS - National School of Engineers of Sfax

2019 – 2022

National Engineering Degree in Computer Science | Honors: Very Good

- **ZAB Equivalence:** Officially recognized as a German **Master's Degree**.

IPEIS - Preparatory Cycle (PTSI)

2016 – 2019

Intensive Mathematics & Physics Program

LANGUAGES

- **English:** Fluent (Professional/Technical Proficiency)
- **French:** Fluent (Professional/Technical Proficiency)
- **German:** Fluent (Professional/Technical Proficiency)
