PROFESSIONAL PROFILE

Cloud Integration Engineer specializing in Google Cloud Platform (GCP) and Infrastructure as Code (Terraform). Proven expertise in orchestrating complex process chains (Workflows), Document AI, and event-driven architectures (Kafka). Experienced in leading migrations and optimizing CI/CD pipelines for global groups (Carrefour, Orange).

TECHNICAL EXPERTISE

Cloud & Orchestration: Google Cloud Platform (GKE, Cloud Run, Workflows, DocAI), Azure

Infrastructure as Code: Terraform (modularization), Ansible, Helm

CI/CD & DevOps: GitLab CI, Jenkins, Docker, Kubernetes (GKE), OpenShift, Vault

Streaming & Data: Apache Kafka, Google Cloud SQL, MongoDB, PostgreSQL

Development: Python (Backend), Java (Spring Boot), Node.js, Angular, React.js

Observability: Google Cloud Operations Suite (Monitoring, Logging, Dashboards)

PROFESSIONAL EXPERIENCE

Devoteam (Client: Carrefour Group)

Sept. 2025 – Present

Senior DevOps Engineer (Cloud & Production)

- **Infrastructure Design:** Leading the administration of complex Azure & GCP environments; automated 90% of provisioning via Terraform modules.
- **Security & Governance:** Implemented HashiCorp Vault for centralized secret management, reducing manual interventions by 40%.
- **Automation:** Designed and optimized enterprise-grade CI/CD pipelines (Jenkins, GitLab CI) for Carrefour's Transport and IO modules.
- **Troubleshooting:** Responsible for L3 support and performance tuning of Linux-based microservices in production.

Sofrecom (Client: Orange Group)

Jan. 2022 – Sept. 2025

Software & Cloud Engineer

- **GCP Integration:** Designed and operated scalable architectures on GKE and Cloud Run; implemented WIF (Workload Identity Federation) for enhanced security.
- **Process Orchestration:** Developed automated data processing workflows using native GCP tools and Python backends.
- **AI & Data:** Integrated Vertex AI and Cloud SQL into production applications; optimized data extraction via automated analysis pipelines.
- **Monitoring:** Set up comprehensive dashboards with Google Cloud Monitoring & Alerting, reducing incident response time by 25%.
- **Fullstack Development:** Developed high-performance backends with Python/Node.js and modern frontends (React.js).

Internships & Projects (Focus: Software Engineering)

2019 – 2021

Tech'Up Consulting, Iovision.io, Acteol, Petroserv Catering

- **Inbound Management:** Developed enterprise backend solutions with Spring Boot and Angular for automated processing and migration of massive insurance data.
- **Database Design:** Designed and optimized relational data structures (PostgreSQL) using JPA/Hibernate.
- **Agile Development:** Fullstack development in Agile teams (Scrum), including REST API integration and mobile frontends (Ionic).

EDUCATION

ENIS - National School of Engineers of Sfax

2019 – 2022

National Engineering Diploma in Computer Science | Grade: Very Good

- **ZAB Equivalence:** Officially recognized as a German **Master's degree** (equivalence evaluation).
- Specializations: Cloud Architecture, Software Engineering, AI, and Distributed Systems.

CERTIFICATIONS & LANGUAGES

- **Google Cloud DevOps Fundamentals / Core Infrastructure** (2024) – Coursera
- **Containerized Full-stack Node.js in Docker** (2024) – Coursera
- **French/Arabic:** Native | **English:** Fluent (Professional) | **German:** B1
